Consumer perceptions and attitudes about sustainability

(Rapport 46/2011, Pirjo Honkanen)

Aim:

- ✓ Insight into consumers perceptions and knowledge about sustainability and different eco label schemes
 - ✓ What does sustainability means to consumers
 - ✓ Do they manage to distinguish between different kinds labels, their content
 - ✓ Does it affect their buying behaviour
 - ✓ How important is sustainability for the consumers' behaviour in comparison to other buying criteria (sensory qualities, price, origin etc.)

Methods:

- ✓ Consumer studies in UK and France
- ✓ Focus group meetings (4 in each country)
- ✓ Survey (ca. 1000 respondents per country)

Sustainability is not an important buying criteria

Most consumers do not look for sustainability logos

Thinking of the last ten times that you purchased seafood, how often do you recall it being labeled sustainable?

	UK (%)	France (%)
Never	35	8
Seldom (1-3)	26	13
Sometimes (4-6)	17	9
Often (7-9)	6	3
Always	16	3
Don't know		64

Producer brand	15 %	65 %	20 %
Supermarket brand	20 %	60 %	20 %
AB (ecological)	40 %	50 %	13 %
MSC	70 %	30 %	4 %

Preliminary results

- ✓ Consumers concern for the environment is related to other issues than fisheries
- ✓ Sustainability in fisheries is not consumer driven
- ✓ The consumers trust / want the supermarkets to do the job for them
 - ✓ too much information out there
 - ✓ too many labels
 - ✓ know too little themselves
 - = how to inform the consumers?

- ✓ Consumers will continue to buy non-certified Norwegian and Icelandic fish if available
 - ✓ The survey showed high confidence in Icelandic and Norwegian fisheries management

- ✓ Consumers are not loyal to one sustainability logo/certifier
 - ✓ 10% MSC loyal, 60% don't care, 30% potential users – who are they?

- ✓ Are consumers willing to pay more for certified fish?
